Assignment 3

Mark as done ✕

• At least **5 images**

2.3 Portfolio Page - CSS Requirements

On your page, you must use CSS so it has:

1. Different colours for fonts and headings

2. Styles for your images, such as a border, rounded edges, a shadow effect, etc

3. Images have appropriate sizes (width and height)

4. A proper **website layout**, as shown in Figure 1 (above)

5. Use the CSS properties of padding, margin, and float to align your content better

3.1 Contact Page - Content

Create a new HTML file called **contact.html**. This page should contain:

- A header image that represents the business

- Links to the other webpages. The links can either be text, a button, or an image.

- The location of the stores (make up your own streets)

- Contact phone numbers (make up your own)

- The days and times that the business is open (make up your own)

- Google Map locations of the stores (just make up your own location)

3.2 Contact Page - HTML Requirements

On your page, you must use HTML tags so it has:

- At least **1** heading

- At least **2** paragraphs

- At least **5** images

- At least **1** unordered list

- **Embed** Google Maps (of the store locations). See Figure 3 for an example.
